

BLAZE

SOFT RED WINTER WHEAT

THE COMPLETE PACKAGE

Blaze is a brand new variety that will definitely get the neighbours talking! A combination of strong agronomics is setting the bar above the tried and true throughout the province. Small seed size allows growers to save money by reduce seeding rates. Packing the FHB 1 trait, Blaze has superior FHB/DON tolerance, setting it apart from the others. Past issues with Stripe Rust? No problem, Blaze has strong tolerance to it as well!

GROWING AREAS

From the Deep South to the Eastern part of the province, Blaze has a great fit! Its strong agronomic package combined with high management will make Blaze a fan favourite. Blaze is currently positioned in grower managed small plot, side by sides, and field scale trials comparing to the tried and true across the province. Stay tuned for the results!

VARIETY SPECIFICATIONS
